

HUMAN RESOURCE MANAGEMENT SYSTEMS

PRESS RELEASE 2 November 2008

## Select Software Achieves Best Quarter Results Ever!

Despite the obvious economic challenges at the present time, Select Software has succeeded in bucking the trend once again and has produced the best quarter results in its history for the second quarter of 2008.

From June to August this year, Select Software's turnover was a record £950k – producing the best ever quarter's sales figures since its inception back in 1996.

"This amazing achievement is due mainly to the phenomenal success of our latest product development, Select HR Web Edition," says Julian Kirkness, Managing Director. "The whole company including Development, Sales, Consultancy and Helpdesk has really pulled together to produce and distribute a truly unique piece of HR software. Feedback from the CIPD Exhibition and Conference and also from Softworld in October has been exceptional. Everybody who has seen the product to date has been impressed. I am thrilled that in these challenging economic times, Select Software has been able to bring together the last 12 years' experience in the HR software sector and produce such a remarkable result!"

A functional evolution of existing products, Select HR Web Edition is completely up to date with legislative requirements. It caters comprehensively for part time and foreign workers, and provides HR departments with all they need to monitor equality effectively within their businesses. Security and data protection are also available right down to field level for each individual user, making the package completely tailored to an organisation's specific requirements.

New clients over this period include Bedell Group, The Royal Society, Nominet, Smartstream and YMCA England.
